BUSINESS MODELOUR

PROBLEMS

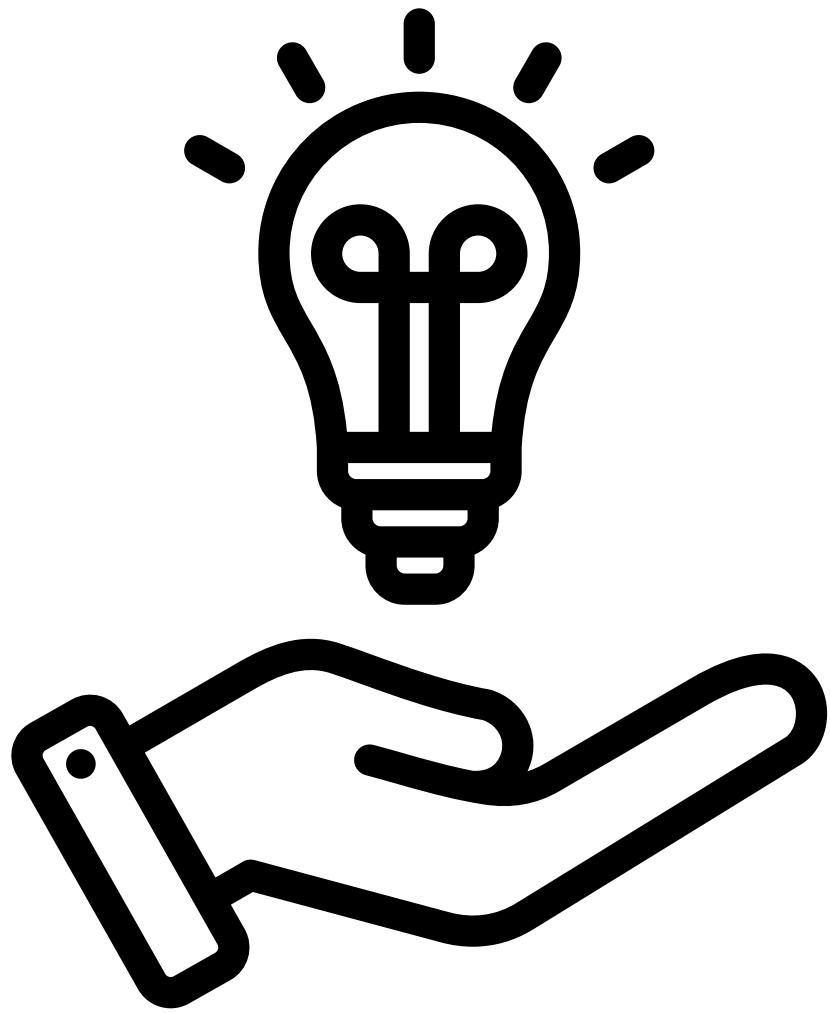

- **start-up companies**
- **Companies that need a cloud to save their work**
- **individuals (Freelancers)**

SOLUTION

- Model AI
- Web Site

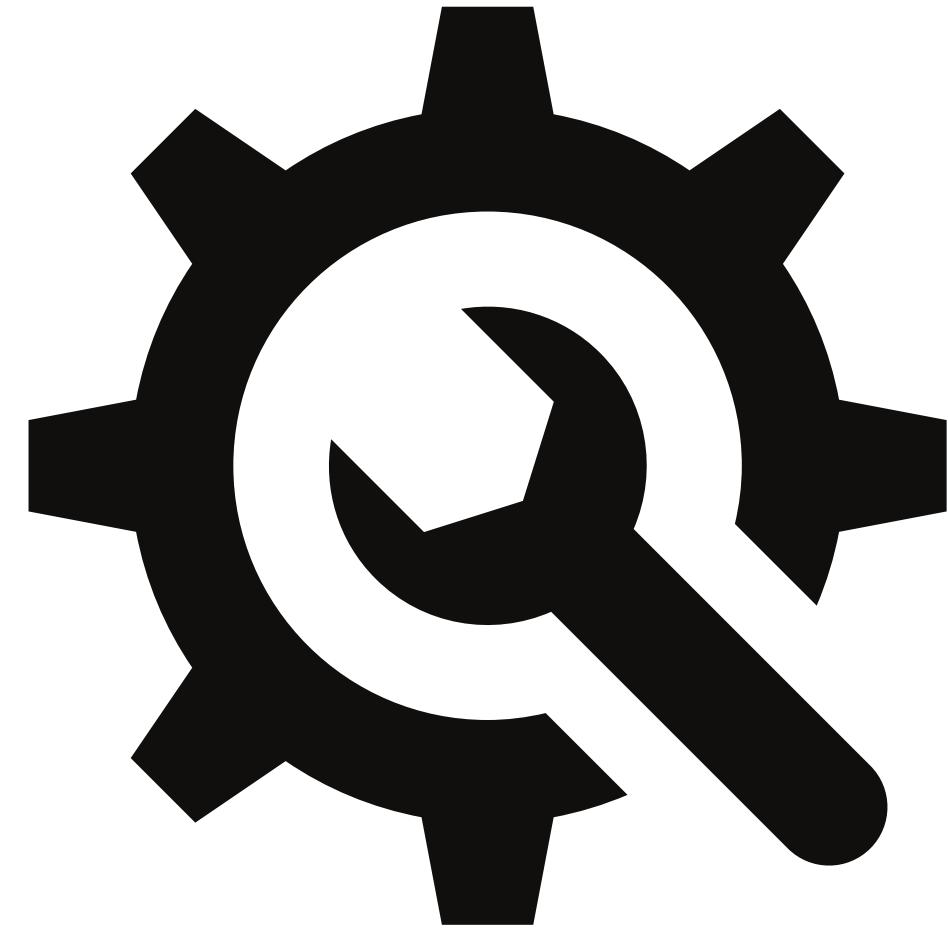

PROJECT GOALS

- Reduce effort
- Cost Ease of use
- Multi Cloud

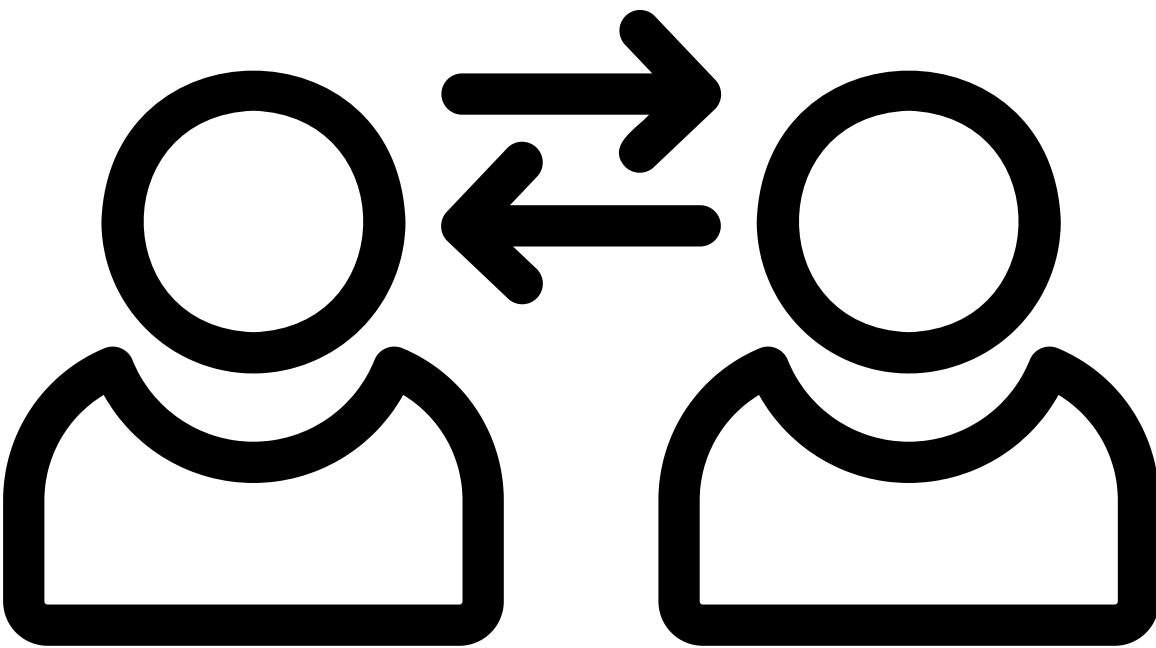

- WEB Site
- AI Chat-Bot

WAYS TO PROFIT

- Subscription.
- Commission.

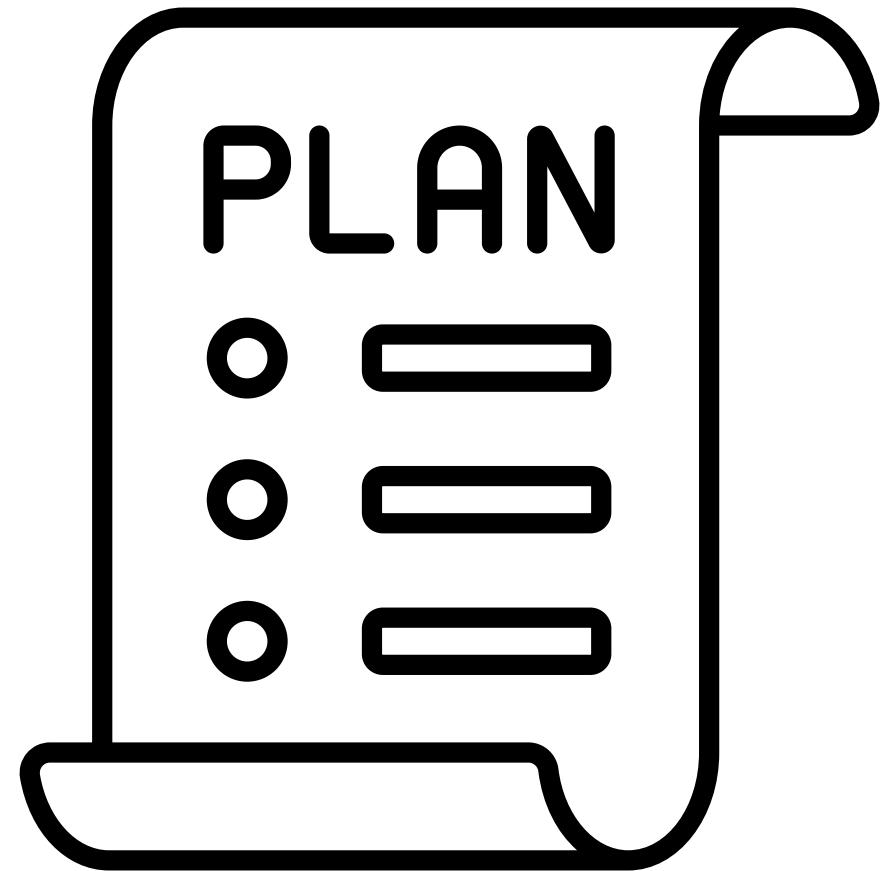

- Social Media
- Participate in events and conference
- Free Trial

FUTURE PLAN

- AI supports
- App
- C-panel
- AI prediction

BUSINESS MODEL

PROBLEM

Most of the existing companies currently suffer from startup problems, and they still need clouds and servers because their own work becomes expensive for the companies that start up..

SOLUTION

We decided that we would create an AI model that would enable start-up companies to access the cloud in the easiest way and without a high cost.

ADD VALUE

- Providing affordable and easy-to-use cloud solutions.
- Reducing reliance on specialized technical teams (like DevOps teams).
 - Using artificial intelligence to analyze company needs and provide accurate recommendations.
 - Automatically setting up and configuring cloud infrastructure without manual effort.
 - Offering fast and accessible support.

TARGET AUDIENCE

- Small and Medium Enterprises (SMEs):*
Those facing challenges in managing their cloud infrastructure or looking for cost-effective solutions.
- Startups:
Companies looking for a quick and efficient way to set up their cloud infrastructure.
 - Freelancers:
Individuals working on their own projects who need ready-to-use cloud solutions

THANK YOU
